GENERAL INFORMATION

This publication provides staff information for all credit programs offered in B.C. community colleges and provincial institutes, as well as class and enrolment information for all major program areas except vocational training.

All of the data in this report are for the 1984/85, 1985/86 and/ or 1986/87 school or fiscal years. The tables and charts within this publication provide a variety of presentations of the data.

The data were obtained from the annual College Statistical reports submissions by institution.

Data Limitations

The reader should note that certain data elements, such as "class size", are based on conventional lecture/classroom courses. For non-conventional instruction (eg. distance education) the concepts of class/section, class size, course hours and student contact hours are not applicable and, thus, are not included in the data presented.

It should also be noted that some institutes, such as North Island College and the Open Learning Institute, have program delivery systems which differ from those of other colleges and institutes, making it difficult for these institutions to report using the existing data formats. As a result, the information for North Island College and for the Open Learning Institute is not fully comparable to that of the other institutions.

Overview

The total number of staff dropped significantly from 7,213 in 1985/86 to 5,872 in 1986/87. This decrease of 19 percent was evidenced by a reduction in the number of staff members but not in Overall FTE. Table 1 illustrates that the part-time total went from 4,134 in 1985/86 to 2,662 in 1986/87. In the same years, full-time staff members increased to 3,158 from 3,058. Tables 1 to 51 are subsequently affected by the decrease, resulting in lower totals for 1986/87 tables.

Number of full-time instructors increased to 1,213 with an FTE (taught) of 1,169.64 in 1986/87 from 1,141 with an FTE (taught) of 1,078.45 in 1985/86.

Average class size went up to 25.3 in 1986/87 from 25.2 in 1985/86.

Number of course registrants in non-vocational courses dropped to 342,316 in 1986/87 from 347,956 in 1985/86.

Number of course registrations in non-conventional instruction and non-vocational courses increased in 1986/87 to 19,990 from 18,488 in 1985/86.

Number of student contact hours in non-vocational courses dropped to 21,471,204 in 1986/87 from 21,805,775 in 1985/86.

It should be noted that table totals are often less than the grand total of staff members which are represented in Table 1. This is due to limiting the number of variables within each table. For example, tables entitled "Full-Time and Part-Time" do not include staff on leave and therefore totals are lower. As well, tables pertaining to gender do not include the "gender not reported" category.
